Soil Health Partnership Call for Proposals

Deadline for proposal submission is March 15, 2019

(ST. LOUIS) – The Soil Health Partnership (SHP) announced it is accepting proposals for partnerships and collaboration for 2019. SHP encourages any organization or individuals who have an interest in working together to submit ideas.

“At the SHP, we collaborate with a diverse network of partners ranging from universities to industry and government groups to non-profits,” said Dr. Shefali Mehta, executive director of the Soil Health Partnership. “These broad partnerships enable SHP to maximize the impact of our work. This year we are making this specific call for proposals to ensure that we continue to seek out diverse partners and include a fuller range of ideas.”

Applicants are required to complete the [Request for Partnership form on the SHP website](#). The deadline for submissions is Friday, March 15, 2019.

“Whether working with soil science or agronomy experts, developing a partnership in a new state as we expand our farmer network, or fueling a graduate student’s passion for soil health, SHP knows that partnerships make our work stronger and more impactful,” said Mehta.

The Soil Health Partnership will review and respond to the submitted proposals by end of April.

About the Soil Health Partnership

The Soil Health Partnership is a farmer-led initiative that fosters transformation in agriculture through improved soil health, benefiting both farmer profitability and the environment. With more than 140 working farms enrolled in 14 states, the SHP tests, measures and advances progressive farm management practices that will enhance sustainability and farm economics for generations to come. SHP brings together broad and diverse partners to work towards common goals. Administered by the National Corn Growers Association, the SHP’s vision is driven by initial and continuing funding and guidance from NCGA, Bayer, the Environmental Defense Fund, the Foundation for Food and Agriculture Research, The General Mills Foundation, Midwest Row Crop Collaborative, National Wheat Foundation, Natural Resources Conservation Service, The Nature Conservancy, the Pisces Foundation and the Walton Family Foundation.
