The elements of our process

Our goal is to partner with farmers to explore the economic and environmental benefits and risks of soil health practices.

On-Farm Engagement

Data & Science

Communications & Outreach

Join the network to:

- Try a new practice or management strategy.
- Work one-on-one with an SHP agronomist.
- Review yearly soil and yield results comparing management strategies on your field to regional and national levels.
- Connect to our community of farmers who are testing new practices.
